

intoxiclock™ Touch-Screen

Results Screen

It's not a good idea to drive a car BLINDFOLDED, yet most people drink that way!

intoxiclock™
Count down to zero

People "wear a blindfold" when it comes to drinking alcohol, drinking without knowing the impact on their Blood Alcohol Concentration (B.A.C.) and impairment level. People will overestimate the amount of alcohol they can drink before becoming seriously impaired or underestimate the amount of time it takes the body to eliminate alcohol from their system. As a result, people can make poor choices that cause tragic consequences.

intoxiclock™ by Innocorp, Ltd. helps you educate your audience about impairment and B.A.C. It illustrates how factors such as time, weight, gender, and the number of drinks all play a role in a person's impairment level and B.A.C.

A 20" x 30" touch-screen allows for the input of personalized information including gender, weight, drinking start time, time spent drinking, and the number of drinks consumed. Using this information, intoxiciclock™ displays on a separate monitor a person's B.A.C. and the time it will take the body to metabolize the alcohol. intoxiciclock™ counts down in real-time the metabolizing of the alcohol drip-by-drip. Your audience will get a real sense of how long it takes a body to eliminate that alcohol. You can then modify the initial input by adding drinks, changing between male and female and their weights, or advancing the time from the first drink. In doing so, intoxiciclock™ instantaneously shows the impact of changing these various factors on B.A.C. The comprehensive Instructor's Guide will prepare and assist you in delivering a memorable awareness and prevention message.

"This is a much needed product and I think it will be a great asset to alcohol education."

-Sue Nowak, Certified Prevention Professional

BENEFITS OF intoxiciclock™

- Personalizes results for each person based on gender, weight, time consumption begins, and number of drinks consumed
- Engaging and easy to use
- A great attention grabber
- It facilitates a discussion on the issue of impairment and B.A.C.
- Helps you promote a clear awareness and prevention message
- Displayed information is clear and easy to read

USE intoxiciclock™ WITH:

- School resource officers
- Heath and driver education classes
- Community festivals and public relations
